Multi-IQ

Simultaneous Multi-Frequency Technology

Obsoletes all single-frequency VLF detectors

EQUINOX 600 | 800

With innovative NEW multi-frequency technology, the EQUINOX Series redefines all-purpose detecting for the serious enthusiast. Equally adaptable for all target types and ground conditions, just set your detecting location and go:

PARK **Great performance in high-trash recreational environments.**

Using Multi in this mode is the most versatile for general coin and treasure detecting.

FIELD **Ideal for detecting fine coins and artifacts.**

Using Multi in this mode helps the specialist find the widest range of target sizes.

BEACH **Excels in dry sand, wet sand, and underwater.**

Beach mode operates in Multi only, and is designed for typical use in beach conditions.

GOLD **Best suited for gold nugget prospecting.**

This mode operates Multi and the high single frequencies of 20 or 40 kHz, optimum for gold nuggets.

“ The Minelab EQUINOX is truly in a league of it's own. In the short time I've been operating this machine, I've recovered deep coins and artifacts from infested sites that other machines simply cannot detect. ”

KEY TECHNOLOGIES

Multi-IQ Low frequencies give more depth on large targets, and high frequencies are usually more sensitive to small targets. With EQUINOX you can operate across the full spectrum of frequencies simultaneously for maximum results.

* 20 kHz and 40 kHz not available as single operating frequencies in EQUINOX 600. Multi-IQ frequency range shown applies to both EQUINOX 600 and 800. | This diagram is representative only. Actual sensitivity levels will depend upon target types and sizes, ground conditions and detector settings.

3F x3

5F x8*

EQUINOX offers up to 5 single frequencies of 5, 10, 15, 20* and 40* kHz, giving an expanded 8-times range of 5 to 40 kHz.
